EDUCATION

Texas Tech University

B.S. Computer Science
Minor in Mathematics

Lubbock, TX

December 2026

WORK EXPERIENCE

Summit Therapeutics

Software Engineering Intern

Palo Alto, CA

May 2026 – August 2026

- Developed an AI-powered ticket orchestration agent using Python, REST APIs, and LLMs to analyze and route **500+** monthly IT support tickets, reducing manual triage effort by **45%**.
- Built a RAG pipeline by indexing **1,000+** SharePoint documents into a vector database, enabling automated resolution of common support requests and reducing ticket workload by **35%**.
- Partnered Engineered a Microsoft Teams chatbot using backend services and API integrations to provide real-time access to internal documentation, accelerating troubleshooting and knowledge retrieval for IT teams.

Cisco (Splunk)

Software Engineering Intern

Boulder, CO

May 2025 – August 2025

- Performed Frontend enhancements to Trace View using React and Typescript, enabling service aware span highlighting across **4+** entry points, which reduced user navigation time by **30%** during trace analysis
- Redesigned Filter and search interactions in the APM waterfall view for **10k+** weekly users, improving scroll-to-match behavior and visual alignment, resulting in a **40%** reduction in missed trace matches
- Refactored sidebar architecture using modern React patterns to support persistent user preferences and collapsible UI sections, enhancing usability and layout scalability across APM views.

ITC Limited

Software Engineering Intern

Remote

May 2023 – August 2023

- Developed and integrated a new inventory management module for the agribusiness segment, resulting in a **10%** increase in logistics efficiency.
- Optimized database queries in the FMCG division's supply chain system, reducing data retrieval times by **25%** and enhancing user experience.
- Collaborated with the IT team to design and implement a streamlined reporting tool for the hotel segment, improving real-time data accuracy and decision-making efficiency.

LEADERSHIP EXPERIENCE

Google Developer Group

Vice President

August 2025 - Present

- Directed cross-functional initiatives such as AI chatbot development and web app projects, fostering real world technical learning and collaboration among members
- Organized and led coding workshops while developing educational resources, resulting in increased student engagement and technical skill-building across the club.

PROJECTS

Splunk APM Trace View Enhancements

August 2025

- Redesigned span highlighting for Splunk's waterfall view to display only the most relevant span, reducing user confusion and improving root cause identification speed.
- Implemented distinct visual indicators and auto-scrolling for search/filter matches, enhancing navigation efficiency

CampusPlay

August 2025

- founded and developed CampusPlay, an application that helps Texas Tech students discover and organize pickup games and campus events, improving student engagement and recreation accessibility.
- Delivered end-to-end features (authentication, scheduling, matchmaking) with React, TypeScript, and Supabase, enabling 50+ organized pickup games.

AI Chatbot Developer

September 2024

- Engineered AmaanGPT, an advanced AI chatbot utilizing LangChain, HuggingFace embeddings, and the powerful LLaMA-3.1-70b model, designed for highly accurate, dynamic interactions
- Pioneered the use of Retrieval-Augmented Generation (RAG) to split and analyze PDF documents, enabling precise, context driven responses

SKILLS

Technical Skills: Python, Java, C++, JavaScript, SQL, MySQL, PostgreSQL, MongoDB

Frameworks: React, Flask, Node.js, Django, API Development, REST APIs, AWS, Docker, Kubernetes, System Design

Data & Analytics: Power BI, Tableau, A/B Testing, KPI Tracking

Tools: Git, Microsoft Suite, JIRA, Tableau, Figma, Qualtrics, NumPy, Pandas, Agile Methodologies, Market Sizing, Process Redesign
